10 REASONS WHY YOU SHOULD CHOOSE TERACOAT

Teracoat high-tech resins are leading European coating systems that are as beautiful in design as they are functional and hard-wearing. Designed in the Netherlands as commercial systems that can be re-coated at any stage in their life cycle, they are largely scratch-resistant due to the warm matt finish and the absence of sealers.

Teracoat floor and wall systems are designed to be installed over tiles, screed, plaster and power-floated commercial floors.

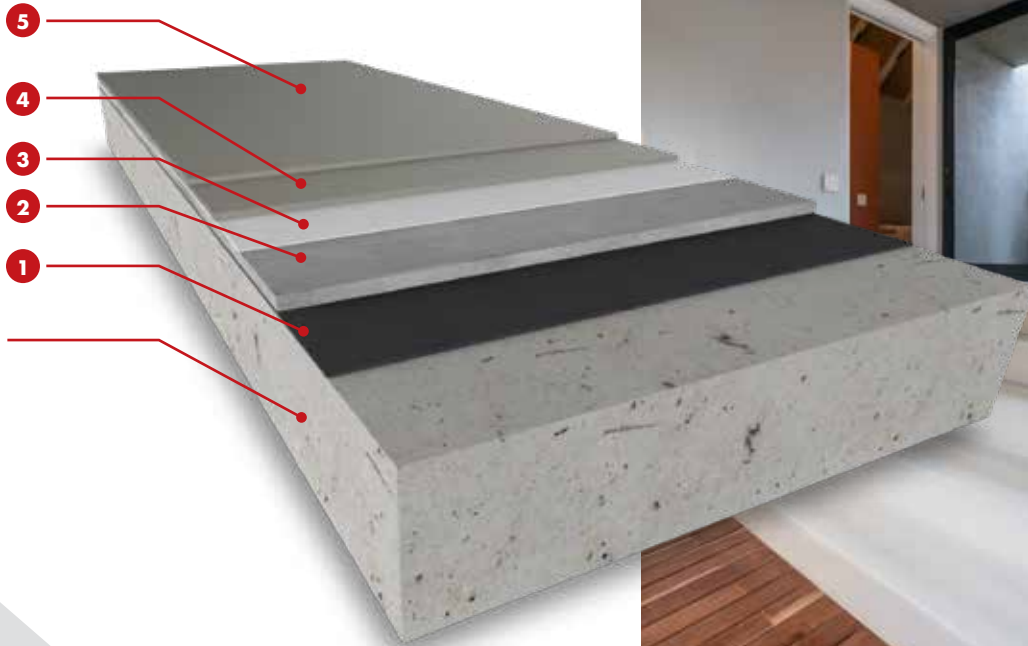

Water-based and environmentally friendly. All TERACOAT products are manufactured to the highest European Environmental Standards and are considered non-hazardous from manufacturing through to the controls in place for application by a TERACOAT-approved applicator.

For more information go to www.teracoat.co.za

1. Teracoat can be installed over tiles
2. Teracoat was designed to be re-coated at any stage during the life of the floor
3. Teracoat creates a beautiful blank canvas to match almost any colour palette
4. Teracoat floors are largely scratch-resistant unlike conventional sealed floors
5. Teracoat feels uniquely warm and soft underfoot
6. Teracoat is a water-based and environmentally friendly range of products
7. Teracoat is a high-tech resin that intrinsically does not crack
8. Teracoat floors and walls can be seamlessly repaired if required
9. Teracoat is imported from the Netherlands and the first of its kind in Sub-Saharan Africa
10. Teracoat Premium is the only product of its kind to offer a 10-year warranty

THE 5-STAGE TERACOAT SYSTEM

- 700 Micron high-tech resin topcoat **5**

- 5mm 25MPa Teracoat Levelling Compound **2**
- 200 Micron latex primer/moisture barrier **1**
- Existing 30-60mm strong wood floated screed or tiled floor

TERACOAT COMMERCIAL RESIN FLOORS

Teracoat resin floors were designed in Europe for office and showroom applications with the ability to be top-coated at the end of a lease should the floor be scuffed or damaged.

The new top-coat application gives the owner the ability to change colours and be back on brand-new floors within 48 hours.

The result is property funds and management companies experience little to no down time when a new tenant takes occupation.

Sustainability – Teracoat’s commercial floors are unparalleled when it comes to sustainability as they don’t have to be chopped out and dumped into landfills. Teracoat’s floors are water-based with very low VOC’s and have been installed on projects like Ernst & Young’s Waterfront Green Initiative Offices.

YUM ! (KFC) Head Office, Bryanston

TERACOAT PREMIUM RESIN FLOORS

Teracoat WB12 Premium is our fully imported European high-spec resin floor and is unrivalled for beauty and underfoot comfort.

These floors are installed by Teracoat's in-house installers and are incredibly smooth due to the application process and the high-tech resin which are designed to flat as they cure.

Our premium 10-Year Warranty is held by Teracoat (Pty) Ltd. for both the application and product so that our clients only deal with Teracoat, the company that owns the product and process.

Water-based and environmentally friendly. All TERACOAT products are manufactured to the highest European Environmental Standards and are considered non-hazardous from manufacturing through to the controls in place for application by a TERACOAT-approved applicator.

For more information go to www.teracoat.co.za

TERACOAT RESIN GLIDE FLOOR

Teracoat's Resin Glide floor is manufactured in South Africa under license to the Netherlands and conforms to a full European Commercial specification.

Resin Glide is a cost-effective solution for those wanting a more textured floor finish whilst retaining the beautiful soft underfoot seamless floor interior. At the price, a Resin Glide floor is unmatched for hard-wearing quality.

The Resin Glide Topcoat is a trowel-on application where light trowel marks are evident in the floor after curing.

TERACOAT DECORATIVE WALL COATING

Teracoat's Skim Coat is an acrylic modified skimming compound that can be applied to almost all solid wall and ceiling surfaces as a decorative skim or to create a modern "off shutter" concrete wall effect.

Skim Coat is water-resistant and is the perfect product for skimming bathrooms, wet rooms or as an exterior finish. Skim Coat creates an instant modern contemporary look and is easily retrofitted over almost any wall surface, including tiles, without the mess and fuss of chopping off existing wall finishes.

If a modern concrete finish is not what you are after, Teracoat's Skim Coat can be easily painted, with no primer, or wallpapered to suit any design requirements.

Water-based and environmentally friendly. All TERACOAT products are manufactured to the highest European Environmental Standards and are considered non-hazardous from manufacturing through to the controls in place for application by a TERACOAT-approved applicator.
